

I don't see how limiting compitation will help anyone. I use the local weather and traffic daily with my XM radio. I also use it when I travel out of town. I can tell what is happening at home for my return trips. I could never get that kind of information prior to XM radio.I would encourage you to reject the NAB's petition (04-160) and allow for free compitation, which will do nothing but help the listening public.

Thank you for your time.

Tom Gibbons
